

Planning a Fun Shower or Stagette!

Having a Bridal Shower and/or Stagette is one of the many wedding highlights a Bride-to-be looks forward to. The planning of this memorable occasion often falls on the Maid of Honor and the rest of the wedding party. A question that many bridal parties ask is 'What type of event to plan that will be fun & memorable, yet celebratory of the occasion as well?'

An easy and economical option is to have a Pleasure Party. These fun and informative party presentations can take place in a home and give all the guests the opportunity to be educated on both naughty and nice adult novelties, sure to enhance any newlywed relationship! What could be more fun for everyone?!

Although the focus of the Pleasure Parties for stagettes and showers is often on the Bride-to-be, each and every guest will be educated in a fun and informative manner. Topics and products to enhance safe sex, preparing and strengthening pelvic muscles for childbirth (and better sex!), and how each and every person can communicate better, and make better use of the quality time spent with their partner are all possibilities. Getting an opportunity to taste, sample and play with the many items makes the night a sure crowd pleasing event!

Pleasure parties are presented in a very professional, fun and comfortable atmosphere where guests can sit back, listen, learn and share in lots of giggles. Games and prizes enhance the night – making this a fun alternative to a traditional bar stagette party. Pleasure parties allow guests to place orders confidentially, and ask personal questions that arise. For their efforts in putting the party together, the host will often benefit with generous bonuses of FREE product, but gift certificates and product can also be added to an anonymous bag for the Bride-to-be, ensuring a fantastic wedding night! Pleasure parties are also a fantastic way to experience a shower for the couple or as a Stag & Doe activity.

Free, Easy, Fun & Informative!
